Probe Search

- Windows executable included `ProbeSearchWindows`
- Read fasta file and search for the predefined probe with maximum of 5 differences

How to install the Windows executable

1. Download the zip file from the above link
2. Uncompress it in your desired folder
3. Look for the exe file - `ProbeSearch.exe` with the icon of magnifying glass
4. Make a shortcut of that file and copy it to your desktop for easy access
